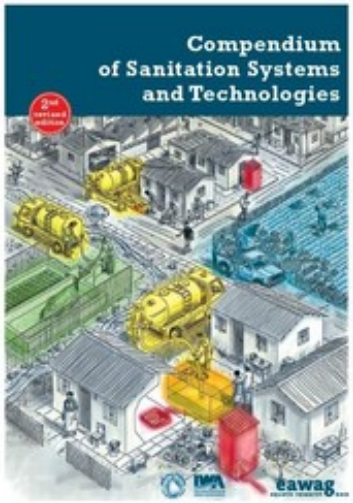
Department Sanitation, Water and Solid Waste for Development

Compendium of Sanitation Systems and Technologies 2nd Edition



This second, revised edition of the Compendium presents a huge range of information on sanitation systems and technologies in one volume. By ordering and structuring tried and tested technologies into once concise document, the reader is provided with a useful planning tool for making more informed decisions.

Part 1 describes different system configurations for a variety of contexts.

Part 2 consists of 57 different technology information sheets, which describe the main advantages, disadvantages, applications and the appropriateness of the technologies required to build a comprehensive sanitation system. Each technology information sheet is complemented by a descriptive illustration.

The Compendium can be downloaded for free.

Download the 2nd Edition:

- English Version [9.04MB]
- French Version [5.66MB]
- Spanish Version [9.54MB]
- Arabic Version [10.34MB]
- Russian Version [8.56MB]
- Romanian Version [9.68MB]

Download the 1st Edition

- English Version [5.27MB]
- French Version [4.27MB]

Spanish Version [4.68MB]

Nepali Version [9.46MB]

Vietnamese Version [11.39MB]

Korean Version (DPRK) [7.13MB]

Sanitation System Drawing Tool

English [1.91MB]

French [5.85MB]

Spanish [1.82MB]

Russian [6.81MB]

Other Documents for Workshops

Blank Sanitation System Template [12.74KB]

Technology Cards with Illustrations [17.00MB]

Modèle de système vide [18.78KB]

Online course (MOOC) around the Compendium

In the MOOC “Planning & Design of Sanitation Systems and Technologies”, the Compendium is reviewed and explained by its main authors. You can register for free
